TRICKS TO FIND YOUR PARTNER'S RINGS SIZE

GUESS WORK TO BEGIN WITH

• Generally people with a small body size have quite a standard ring size, so if you want to guess it you can begin with a size H or I for women and N for men.

If your partner is tall, that is more than the average height you can go with L1/2 for women and Q for men. Lastly if your partner is a big built and, you can start with N for women and T for men

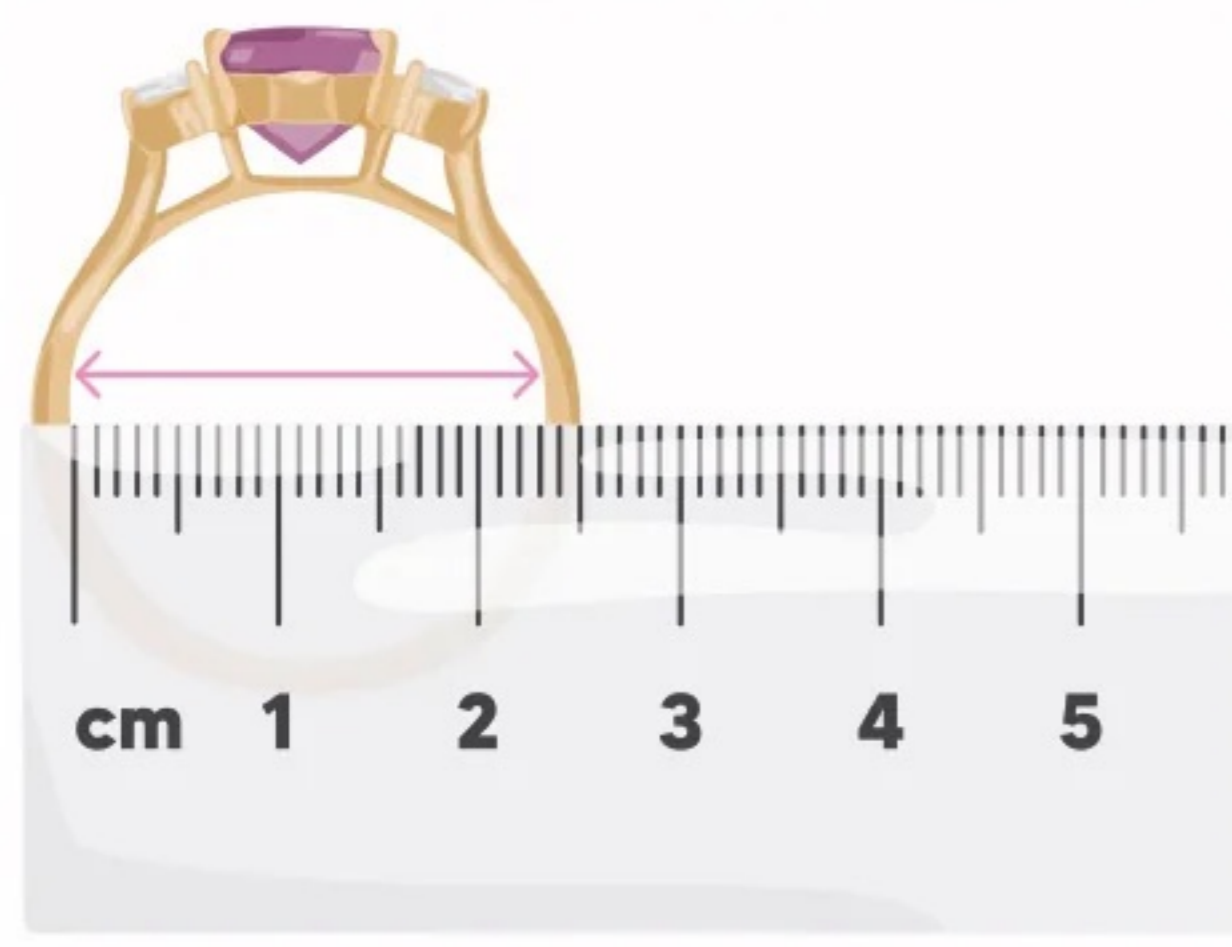

• STEAL A RING (and give it back)

It's always easy to find the size if you have a ring the have been wearing recently

• LAST TRICK

This one is actually one of our favorites, slide their previously worn ring into your own ring finger and when it gets stuck, mark that point with a marker on your finger. When you visit the jeweler, you will get a size closest to the desired one.

HERE ARE TWO WAYS YOU CAN MEASURE YOUR RING SIZE.

• Measure a ring you already own

• Measure your figure to find your ring size.

1 Cut a thin strip of paper.

2 Wrap the paper around your finger. Make sure it's snug.

3 Mark with a pen where the two ends meet.

4 Measure length on a ruler from tip to pen mark.
